Emergency Airway Supplement – Video Laryngoscopy

Initial Date: 6/5/2024

Section 7-9 (S)

Video Laryngoscopy

Video laryngoscopy may be used as an adjunct in orotracheal intubation. The device used for video laryngoscopy must be approved by the MCA. The device shall be used according to manufacturer instructions. All requirements for endotracheal tube placement and verification shall otherwise be followed per the Airway Management protocol.
