

***HEMS MCA***  
**System Protocol**  
**Bougie Device**

Date: 4/2/2025

Section: 7-9 (S2)

---

**Bougie Device**

Bougie Device may be used as an adjunct in orotracheal intubation. The Bougie device must be approved by the MCA. The Bougie shall be used according to manufacturer instructions on any anticipated difficult intubation and/or use of a video laryngoscopy. All requirements for endotracheal tube placement and verification shall otherwise be followed by the **Airway Management Protocol**.

MCA will maintain a list of participating agencies and the agencies will provide training prior to use by any members.
